

# TIPS TO KEEP YOUR HOME WARM AND DRY

TIP 1

Hang your laundry outside to dry – a load of washing can add 5L of moisture to your home!

TIP 2

Open your curtains as soon as you get up, and close before the sun sets.

TIP 3

Use an extraction fan when having showers and cooking – cooking can add up to 3L of moisture to your home.

TIP 4

Open windows as wide as they go for half an hour a day. Get rid of the overnight moisture – dry air is easier to heat later.

See [ecomatters.org.nz/healthyhomes](https://ecomatters.org.nz/healthyhomes) for more info. Ask about our workshops where we come to your group meeting and share many low-cost or no-cost tips and tricks for a warm, dry home.
